Ken Wilcox
Osprey Environmental Services
3900 Fraser Street
Bellingham, Washington 98226

Dear Mr. Wilcox:

Thank you for the opportunity to review the proposed boating survey for Heislars Creek. We agree with those points raised by the Washington Department of Ecology (letter dated June 25, 1993). However, while several boaters are assembled, we should take advantage of this chance to evaluate the suitability of the flow on that day.

Enclosed is our proposed survey for the study. Many of the questions have proven value as they have been used on other, larger flow studies. I believe that these questions, or some variation, should be answered in order to generate a clear understanding of the potential of Heislars Creek.

Please keep us informed of your progress. We are available for further review and for the actual study. If you have any questions, please contact me at (206) 553-4400.

Sincerely,

Daniel Haas
Division of Recreation Programs
